PHP Unit Testing with PHPUnit, *Udemy*	Nov 2020
Build a PHP MVC Framework From Scratch, *Udemy*	Jun 2020

</> Projects

Misk DT - DevOps Infrastructure — May 2023 – present
- Planned the process by coordinating with Development Team and Operations Team.
- Designed the process in a workflow diagram to describe the high-level steps and implemented the process using Azure DevOps.
- Tested the process on two test environments and two real websites (Diwan and MANGA).
- Wrote the technical document for the implementation process for future reference.
- Presented the final presentation on leadership for their approval.
- Deployed the new DevOps infrastructure on all Misk websites with a 90% success rate.

Uploady, *Simple File Uploading Software* — Dec 2020 – Jul 2022
- Created the base framework for the software with authentication and a custom library for file uploading with more than 1500+ lines of code.
- Built the application structure and the user interface using Bootstrap with PSR-12 standard in mind.
- Visualized the collected data using 2 types of charts, bar charts, and map charts.
- Serviced end-users with the system using GitHub Ticketing System and closed 4+ tickets.

- Integrated 2+ packages developed externally using PHP (PhpFileUploading, PhpMigration) to DRY the software.
- Secured the software with 2FA, and filtering with more than 3+ types of filters to handle different data types.
